Wiper Technologies Mobile Displays are specifically designed to give maximum impact in both a retail and service environment. This eye catching, rolling mobile display is offered in three different versions. Our MOBILEDISPLAY-28 (shown here), MOBILEDISPLAY-8 and MOBILEDISPLAY-LB allow maximum versatility for product placement. Contact a Wiper Technologies distributor or Wiper Technologies for more information on any of our Mobile Displays.

Mobile Display Part Number-MobileDisplay-28

Display consists of the following:

Part Number	Description	Quantity
WT1-22	22" Universal Blade Assembly	4
WT6-24	24" Heavy Duty Blade Assembly	4
WT6-26	26" Heavy Duty Blade Assembly	4
WT6-28	28" Heavy Duty Blade Assembly	4
WT6-32	32" Heavy Duty Blade Assembly	4
WT8-28	28" J Hook Radial Heavy Duty Blade Assembly	4
WT8-32	32" J Hook Radial Heavy Duty Blade Assembly	4

Also Includes all Display Hardware, Header Card, Label Holders and Application Guide

Improve your vision Wiper Technologies comprehensive line of quality wiper blades. Wiper Technologies has wiper blades for virtually all “A” Class RV’s on the road, so you will always be sure to have the right wiper blade on hand. That’s why Wiper Technologies has the best RV wiper blade range on the market. With the increasing popularity of RV’s every year, there is a greater need to replace the wiper blades more often. Make wiper blades the number one safety item to replace every six months.

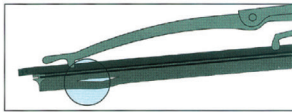

All Wiper Technologies wiper blades feature a rugged metal construction and a “longer life” rubber wiping element for consistent, reliable performance.

Remember: Over 95% of all driving decisions are based on vision. Changer your wiper blades now. For safety’s sake, insist on the best and that’s Wiper Technologies.

1. CONTAMINATED RUBBER

Usually caused by road film, tar, and other chemicals adhering to the rubber refill surface. This will make the wipers streak/smear across the Windscreen.
Remedy • Replace the wiper blade.

2. TORN RUBBER

This is caused by long periods of sun and heat damage and usually occurs on older refills. The refill will usually slap the windscreen on each pass.
Remedy • Replace the wiper blade.

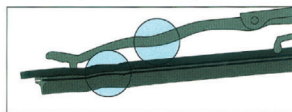

3. PARK SET RUBBER

Hardened rubber refill caused by direct sunlight and/or extreme temperature variations when wipers are idle. The rubber has lost most of its flexibility for effective return action. A permanent curve in the rubber will cause a chattering sound as the wiper passes across the windscreen.
Remedy • Replace the wiper blade.

4. CRACKED RUBBER

This is generally found on particularly old wiper refills. The rubber is split, torn etc. This will result in very bad wiping performance . . . streaking, chattering etc.
Remedy • Replace the wiper blade.

5. DAMAGED WIPER BLADE FRAME

Bent arm, wiper blade or refill backing. This can be caused by tampering, vandalism, automatic car wash machines or by lifting bonnet whilst wiper blades are raised.
Remedy • Replace the complete wiper blade and check wiper arm.

You should inspect wiper blades every 3-6 months and replace for safer driving visibility

6. REGULAR REPLACEMENT
