

10" Designed in the U.S.A.  
Pricing is for mattress only. Fits standard bedroom furniture (not included).

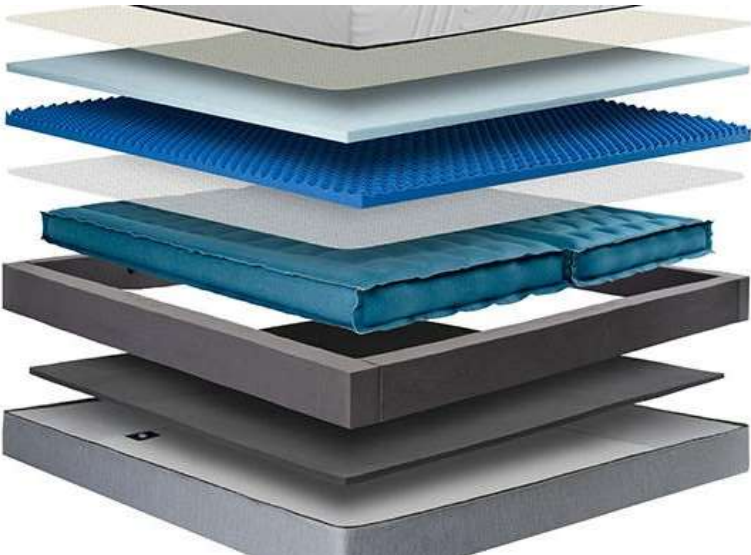

## Personal Comfort S5 Bed

Compare to Sleep Number® Advanced Series. The Personal Comfort Advanced Series is a best overall value. The S5 is a very popular model with advanced features and benefits to help give you a better night's sleep. The S5 Advanced Series Beds have an embossed stretch top cover to help keep your body closer to the contouring benefits of the gel infused comfort layer supported by an air flow comfort layer.

Both comfort layers are CertiPUR-US® Certified. Under the comfort layers feature an Airlayer™ fabric also creates a breathable mattress cavity, allowing for constant airflow throughout the interior of your mattress and helping to dissipate heat and moisture.

These models come standard with our fully digital state-of-the-art air control unit with one wireless remote control. Our air control unit uses a medically recognized pressure scale with 45 unique number settings, from 5 to 50. Our 2-Zone technology allows complete adjustment for each sleeper and our wireless remote controls offer complete individualized personalization.

^ TECH SPECS ^
